DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: after conducting a search of U.S. and foreign patents, as well as non-patent literature, no reference was found that mentions the measurement of the amount of distortion of adjacent known radio signals to estimate the frequency of the direct wave associated with the received information signal as well as the center frequency of the Doppler spread associated with the received information signal. No reference(s) which discloses the estimation of direct wave frequency and the estimation of the center frequency of a Doppler spread via the use of other signals, in the context of automatic frequency control receivers, was found. Since all five independent Claims recite the aforementioned procedure, all Claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
